

# REVIEW THE BLUE

We understand that LEOs are under a microscope especially due to some of the current events.

The system is designed to encourage a positive and professional interaction between LEOs and the public.

The system is named and designed to allow the public to have a voice in digitally commenting on their interaction with the LEO.

## WHY ?

Review The Blue will provide an interface to Law Enforcement Agencies to upload the Name, Email, and or a Cell phone number of individuals that have had an interaction with a LEO.

These contacts will receive a text message or an email and only one response will be registered per interaction.

Review The Blue will maintain anonymity of the respondents.

The data will be tabulated for each officer and will be shared with the department head.

PDs will be able to login and review data about individual officers and officers collectively by various criteria like race, age, sex and nationality and the data broken down by each of these profiles to show the officer's average star rating per profile.

This data will be invaluable for Law Enforcement Agencies.
